EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering **Sep 2023 – May 2027**
Vellore Institute of Technology
CGPA: 8.78/10

Secondary and Senior Secondary Education **Mar 2008 – May 2023**
St. Francis School, Indirapuram
Class 12: 91.4% | Class 10: 97%

WORK EXPERIENCE

Technical Data and AI Intern **Jun 2026 – Aug 2026**
BabaClick

- Architected an end-to-end order fulfillment tool from scratch by integrating the ShipStation API, automatically splitting and optimizing customer orders by sourcing and delivery feasibility, using Cursor and Claude Code.
- Built profitability, pricing, and sourcing analytics dashboards that surfaced products with more than £2 daily price variation and chain-specific sourcing constraints, sharpening procurement decisions.

Data Analyst Intern **Sep 2025 – Oct 2025**
Vodafone Intelligent Solutions (VOIS)

- Transformed real-world datasets into actionable insights through Python, Pandas, and Excel data cleaning, preprocessing, and visualization.
- Built an AI-powered conversational Interactive Voice Response (IVR) voice agent using Inya AI, Large Language Model (LLM) orchestration, and Text-to-Speech (TTS).

PROJECTS

AI-Powered Documentary Generator | Gemini, n8n, Google Cloud TTS, FFmpeg, REST APIs

- Engineered a fully automated short-form video pipeline covering script generation, multimodal scene creation, narration, and 9:16 rendering, powered by asynchronous REST API workflows, scene-level transcoding, job polling, and multi-scene concatenation.

Veritas AI: AI-Powered KYC Verification | LLMs, Gnani AI, Supabase, FastAPI

- Built a real-time, voice-driven conversational AI system that guides users through Know Your Customer (KYC) verification with LLM-based dialogue handling, structured data capture, and reliable backend storage.

Lane Detection for Autonomous Driving | Python, OpenCV, Computer Vision

- Engineered a real-time lane detection pipeline using OpenCV and Hough Transform, optimizing image preprocessing and Region of Interest (ROI) masking to improve detection accuracy.

Netflix Data Analysis | Python, Pandas, Excel

- Conducted Exploratory Data Analysis (EDA) on 7,000+ records, cutting data redundancy by 60% and uncovering key genre and regional trends through advanced Excel and visual reporting.

SKILLS

Programming Languages: Python, SQL, Java, Data Structures and Algorithms

Data Analysis and Visualization: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI, Advanced Excel, Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Data Visualization

AI and Automation: Machine Learning (ML), Large Language Models (LLMs), AI Agents, Generative AI, Gnani AI, n8n, ChatGPT, Gemini, Claude Code, Cursor, Gamma, FormulaBot

Tools and Technologies: Git, GitHub, AWS Cloud, FastAPI, Computer Networking, IT Security, Operating Systems

CERTIFICATIONS

Meta Data Analyst Professional Certificate (6-course specialization) | Google IT Support Professional Certificate | The Bits and Bytes of Computer Networking (Google) | Software Engineer Certificate (HackerRank) | Machine Learning (NPTEL) | Marketing Analytics (NPTEL)

ACHIEVEMENTS

- Silver Medal and Top 5% ranking in the NPTEL Machine Learning certification program.
- Gold Medal in NPTEL Marketing Analytics for outstanding academic performance.
